

Countermark  
H

```
graph TD; A((Countermark H)) --> B((Does the letter 'P' extend above the 'H'?)); B -- YES --> C((HP.a.)); B -- NO --> D((HW.a.a. or HW.a.));
```

This flowchart starts with a black circle labeled 'Countermark H'. An orange arrow points down to a yellow circle asking 'Does the letter 'P' extend above the 'H'?'. From this central question, two orange arrows branch out: one to the left pointing to a yellow circle labeled 'HP.a.' (labeled 'YES'), and one to the right pointing to a yellow circle labeled 'HW.a.a. or HW.a.' (labeled 'NO').

Does the  
letter 'P'  
extend above  
the 'H'?

YES

HP.a.

NO

HW.a.a.  
or  
HW.a.
